

Enterprise AI Sales Playbook

Version

v1.0 – Production Ready

Purpose

This playbook standardizes the sales process, messaging, qualification, objection handling, demos, proposals, and handoff for an AI SaaS platform.

Ideal Customer Profile

Mid-market and enterprise organizations with 50–5000 employees, B2B sales teams, customer support teams, or operations teams seeking AI automation.

Core Value Proposition

Reduce manual work, improve sales productivity, centralize knowledge, accelerate onboarding, automate call analysis, and provide AI-powered sales assistance.

Sales Process

1. Prospecting
2. Qualification (BANT / MEDDIC)
3. Discovery Call
4. Product Demo
5. Technical Validation
6. Proposal & Pricing
7. Security / Procurement
8. Negotiation
9. Closed Won
10. Customer Onboarding

Discovery Questions

- Current sales workflow?
- Biggest bottlenecks?
- CRM in use?
- Call volume?
- Knowledge management process?
- Success metrics?
- Decision makers?
- Budget and timeline?

Demo Flow

1. Business overview
2. AI knowledge base
3. AI call assistant
4. Document ingestion
5. Analytics dashboard
6. Security & permissions
7. ROI calculation
8. Q&A;

Common Objections

Price → Focus on ROI and time saved.

Already using CRM → Integrates with existing CRM.

AI accuracy → Human-in-the-loop and continuous improvement.

Security → Encryption, RBAC, audit logs.

Competitive Positioning

Differentiate on AI accuracy, retrieval quality, workflow automation, production-grade architecture, integrations, analytics, and customer success.

Proposal Checklist

- ✓ Business goals
- ✓ Scope
- ✓ Deliverables
- ✓ Pricing
