

Product

AI Sales Intelligence Platform

Overview

The AI Sales Intelligence Platform helps sales teams manage leads, search product knowledge, answer customer questions using retrieval augmented generation (RAG), and analyze sales conversations.

Target Customers

Mid-size and enterprise B2B SaaS companies with outbound sales teams.

Key Features

- Lead Management
- Product Knowledge Base
- Semantic Search
- AI Chat Assistant
- Voice Sales Agent
- Conversation Intelligence

Pricing

Starter: \$49/user/month

Professional: \$99/user/month

Enterprise: Custom pricing

Common Objections

1. The price is too high.

Response: Demonstrate ROI using reduced research time and higher conversion rates.

2. We already use a CRM.

Response: This platform integrates with existing CRMs instead of replacing them.

Competitors

Competitors include Gong, Chorus, Salesforce Einstein, and HubSpot AI.

Sales Playbook

Ask discovery questions first. Confirm customer pain points before presenting features. Always summarize business value, propose a pilot, and agree on next steps.

FAQ

Q: Does it integrate with Salesforce?

A: Yes.

Q: Is customer data encrypted?

A: Yes, data is encrypted in transit and at rest.
